

ISO 31000:2009 translated into the Arabic language available

Due to the importance of risk management in assisting all sectors to maintain and improve their business, a translation into Arabic language for ISO 31000: 2009 Risk Management - Principles and Guidelines has been adopted by Jordan Standards and Metrology Organization (JSMO) to motivate the organizations in Jordan as well as in other Arab countries to sustain their growth by improving their management of risk by adopting one of the most recognized and applied risk management standards in the world. The Arabic version of ISO 31000:2009 has been officially accredited and is being implemented in Jordan since October 2nd, 2017 after having been approved by the Jordanian Cabinet as a Jordanian Standard for Risk Management under the name of »JS 2159/2017 Risk Management - Principles and Guidelines«. The Arabic version, is now available to the public from Jordan Standards and Metrology Organization. Interested parties inside Jordan can buy their copy directly from the Information Center at Jordan Standards and Metrology Organization. Those interested outside Jordan, can buy a copy by contacting JSMO through one of the following email addresses:

- enquiry@jsmo.gov.jo,
- jsmo@jsmo.gov.jo,
- basma.assaf@jsmo.gov.jo

As soon as the Information Center at JSMO receives an email request a detailed invoice will be issued and sent to the interested party with the banking details to transfer the standard's fees by a bank transfer. The price of the Arabic version is twenty Jordanian dinars in addition to taxes of 16% (including tax JOD 23.20 equal to USD 32.48).

Information and translation forwarded by Raida Mashal, CFIRM, MSc. RM
CEO, Jordan Risk Management Center for Training (Jrmc)
